

Apprentice Case Study

Lee Bailey - Dual Fuel Smart Meter Installer, Morrison Utility Services

Lee Bailey, aged 32, has spent the last 15 years painting aircraft in his home county of Essex. It is a role Lee very much enjoyed but he decided it was time for a change when he heard about the Dual Fuel Smart Meter Installers Apprenticeship programme.

"I have a young family and the long hours and working nights weren't what I wanted anymore - It was a good time for me to make a change. I saw this Apprenticeship as an opportunity to learn a trade and work for a company that would allow me to build a long term career."

Lee is really enjoying his apprenticeship so far, *"I loved being out with my e.on mentor, I have learnt so much and have a really good support network around me. My mentor is still speaking with me and offering advice - he and all the e.on team have been fantastic."*

Lee has already spent time installing meters in the north of England, gaining experience on the job. He loves the opportunity this apprenticeship has provided him to be out and about meeting lots of people as he completes his installations.

"This is definitely my future, I want to build a career with MUS and climb up within the company. I have no regrets, this was certainly the best decision for me and my family."

Lee is looking forward to completing this Apprenticeship and moving forward with his career.
